

## DeCAL: Building and Construction

At Devine Chemicals, we have utilised our in-depth knowledge and experience of the speciality chemicals sector to develop DeCAL, our own range of high quality and versatile chemicals. Our DeCAL grades are suitable for a wide range of applications in the building and construction industry including tile adhesives, grouts and fillers, resin floors and sealants and other applications.

### Liquid Grade Superplasticisers/ High Range Water Reducers

#### DeCAL 2097+

Extremely high efficiency. Excellent for both precast and ready-mix concrete.

#### DeCAL 2098

Tailored for fast set applications and self-levelling compounds with anti-shrink properties.

#### DeCAL 2099

Tailored for extended open times and good flow retention. Enhanced anti-shrink properties.

### Powder Grade Superplasticisers/ High Range Water Reducers

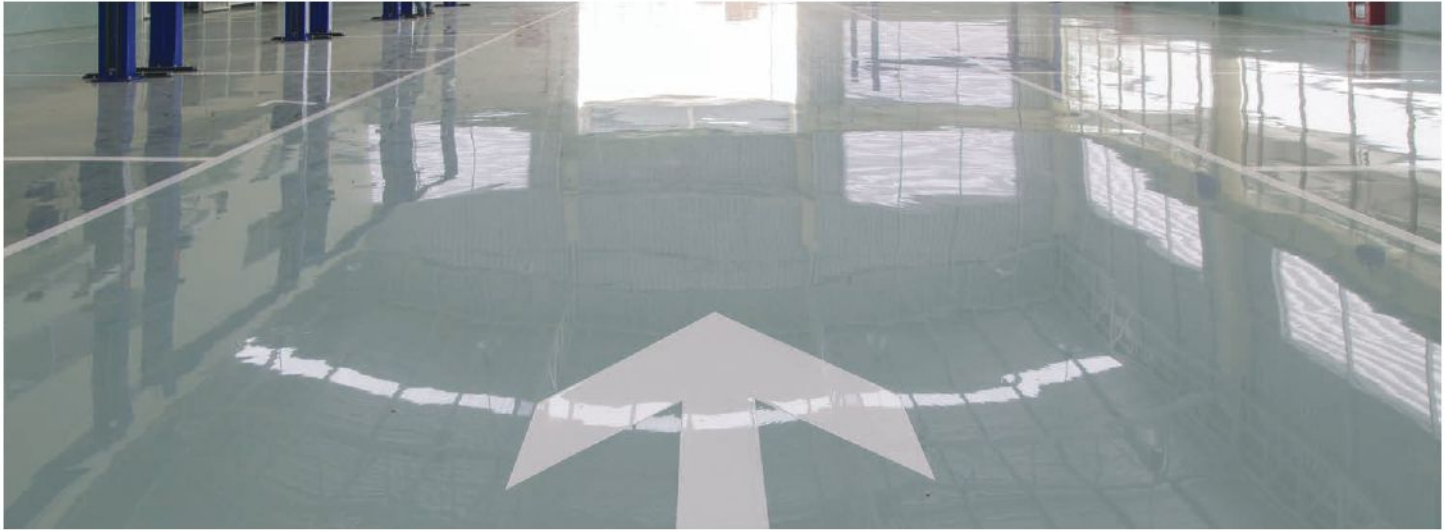

#### DeCAL 2094+

Application in self levelling compounds and underlayment. Gives superior flow to plasters, grouts and concretes.

#### DeCAL 2095

Application in self levelling compounds and admixtures. Exhibits strong water resistance and excellent surface smoothness.

## Rheology Modifiers/Stabilisers

### DeCAL 1200

Additive for anti-sag and sag resistance.

### DeCAL 1201

Powder form of DeCAL 1200.

### DeCAL VMAP

A family of innovative polymers for modifying viscosity in cementitious applications. Available in a variety of molecular weights and also in powder form.

### DeCAL 9124

Powder additive for increasing open time. Also prevents bleeding and segregation, with anti-sag properties.

### DeCAL 9313

Additive for improving workability of mortars and grouts. Very low dosage required. Also acts as a stabiliser.

## Binder

### DeCAL 4033

Crack bridging additive for cements.

## Air Entraining Agent

### DeCAL 2190

A sodium lauryl ethoxy sulphate solution with very high foam generation.

## Anti-Efflorescence Additive

### DeEFFLO

Innovative efflorescence prevention additive with plasticising properties.

## Accelerators

### DeCAL 9090

Cost effective hydration accelerator for fast set binder systems.

### DeCAL 9095

Hydration accelerator enhancing fast set times/early strengths in more sophisticated binder systems.

## Defoamers

The DeCAL 5000 series includes a number of powder and liquid defoamers for use across the spectrum of construction applications.
